Electronic Door Access Control with RFID Card Reader Support

Safeguard Your Data Center Against Physical Threats and Intrusions

Today's data center professionals are facing a wide range of security management issues. Their data centers are continuously exposed to physical and informational security threats from both external and internal sources. They need to comply with increasingly stringent company requirements and industry regulations. And they have to address these challenges while under pressure to maintain uptime, drive efficiency, and generally do more with less. Basic, low-level safeguards are no longer adequate for the complexities of modern data centers.

Sunbird's Power IQ® DCIM Monitoring software provides a single, centralized system for transparent, high-visibility data center access management. Having a single, centralized system for door access management enables users to save time, eliminate the stress and hassle of keeping track of physical keys, and even meet HIPAA and other compliance requirements. The electronic access support for smart cards and granular access permissions in Power IQ provide organizations with the data they need to mitigate risks and to ensure security and compliance.

Remote Door Lock Control to Manage Access Anytime, Anywhere

- Remotely lock and unlock doors to restrict physical access to individual cabinets and containment areas in your data center
- Ensure no door is left unlocked with a user-configurable, global auto-relock timer
- Limit who has permissions to configure and manage doors within the software

RFID Smart Card Reader Support For Security and Compliance

- Track who goes in and out of your data center with smart card and RFID authorization support
- Easily create, assign, deactivate, and track smart cards within the software
- Restrict access at the card level with granular role-based user permissions
- Comply with security requirements, organizational procedures, and SLAs

Door Security Reports for Real-Time Status Updates

- Door security status report shows an at-a-glance view of the status of all doors, locks, and handles
- Door security audit report displays access request data over a historical period of time so you can understand who accessed what and when
- Real-time access authorization events are captured in the system audit log with critical details about the access requests
- Export reports to PDF or CSV or schedule email delivery to share the data with your team

Works with Raritan®, CPI®, and Panduit® Hardware!
Electronic Door Access Control with RFID Card Reader Support

Door Lock Control
Lock and unlock doors remotely from within the software. Associate sensors to doors, handles, and locks with drag-and-drop ease. Easily locate the door and its sensors in the EDM hierarchy.

Card Reader Management
Add RFID card readers to the system via autodiscovery. Easily associate cards with doors to provide users with the appropriate level of access at each door.

Card Access Control
Assign one or more cards to users. Any updates made to card assignments, including when cards are created, activated, and deactivated, will create entries in the Power IQ audit log.

Door Audit and Status Reports
Keep an eye on who goes in and out of your data center with audit and status reports that provide access request details and indicate the statuses of your doors, locks, and handles.

Sunbird Software is changing the way data centers are being managed. With a focus on real user scenarios for real customer problems, we help data center operators manage tasks and processes faster and more efficiently than ever before, while saving costs and improving availability. We strive to eliminate the complexity they have been forced to accept from point tools and home grown applications, removing the dependency on emails and spreadsheets to transform the delivery of data center services. Sunbird delivers on this commitment with unexpected simplicity through products that are easy to find, buy, deploy, use, and maintain. Our solutions are rooted in our deep connections with our customers who share best practices and participate in our user groups and product development process.

Based in Somerset, NJ, Sunbird serves over 1,000 DCIM customers worldwide. For more information, please visit SunbirdDCIM.com.
